by crosswater 
LONDON

Ressa has arrived

No longer an extravagant luxury, the Ressa™ Spa Toilet™ is the new standard for a refreshing and hygienic bathroom experience.

With elegant Scandinavian design and efficient performance, Ressa by Crosswater offers an unmatched balance of features, aesthetics, and surprising affordability.

Automatic pre-mist

Upon seating, a mist coats the bowl with a light spray of water, reducing residual flushing.

Customized for you

Multiple cleaning modes for greater comfort and hygiene.

Water-efficient flush system

A unique two-step flushing reduces water consumption.

Simple, streamlined design

Universal-height, skirted bowl with classic u-shape contour.

Built-in diatom deodorizer

Converts unpleasant odors and particles into oxygen, keeping your bathroom fresh at all times.

Easily Customizable

Smart Features

Spray Pressure

3 adjustable pressure levels.

Front Spray

Multi-directional front washing function, adjustable to your cleaning needs.

Water Temperature

6 adjustable water temperature levels.

Night Light

In-bowl illumination.

	Adjusts water pressure, front and rear wand positions, water temperature, dryer temperature and seat temperature
	Includes wall-mount hanger
Batteries not included	

Our commitment to cleaner oceans

We endeavored to create a beautiful spa toilet that not only reduces paper waste and water usage, but also substituted Styrofoam and plastic packaging.

In a further effort to help create a cleaner world, we have also aligned with Upstream® by donating proceeds of every Ressa sold.

Upstream is a non-profit organization that sparks innovative solutions to plastic pollution by helping people, businesses and communities shift from single-use to reuse. They're creating a world where people and the planet are treated as indispensable so we can thrive without all the waste.

Water-efficient

Ressa's pre-mist function and two-step flushing system reduces the need for residual flushing and consumes less water.

Responsible Packaging

All Styrofoam packaging — typically used by other manufacturers — has been eliminated and replaced with recycled "honeycomb" cardboard.

Paying it Forward

By supporting Upstream® in their efforts to eliminate plastic pollution, we can all enjoy a cleaner, waste-free future.
